

NVIDIA CORPORATION - ANNUAL REPORT (FORM 10-K)
FISCAL YEAR 2025 HIGHLIGHTS

NVIDIA reported record full-year revenue of \.5 billion, up 114% from \.9 billion in the prior fiscal year.

Compute & Networking revenue reached \.0 billion driven by robust enterprise adoption of our Blackwell architecture.

Data Center gross margins expanded to 75.8% as customers scaled deployments for large language model training.

NVIDIA 10-K: RISK FACTORS AND GEOGRAPHIC EXPOSURE

Risks Relating to Our Business and China Market Exposure:

Our business in China has historically represented a meaningful portion of our Data Center segment revenues. Due to U.S. export control regulations on advanced computing chips, we have developed modified products for the market. However, further geopolitical tensions, modifications to export control thresholds, or retaliatory measures by foreign governments could impact our business. Additionally, our production heavily depends on Taiwan Semiconductor Manufacturing Company (TSMC) for advanced semiconductor manufacturing.

NVIDIA 10-K: MANAGEMENT DISCUSSION AND ANALYSIS (MD&A)

Cash Flow and Capital Return:

Free cash flow for the year reached \.8 billion compared to \.0 billion in fiscal 2024.

Cash, cash equivalents and marketable securities stood at \.2 billion.

Management authorized an additional \.0 billion share repurchase program and quarterly cash dividend payment

Research and Development (R&D) expense increased 38% to \.1 billion as we accelerated full-stack accelerated
